

Your guide to Sponsored Content Emails for **AUDIOLOGYonline**

Sponsored Content Emails look like AudiologyOnline emails, but they're devoted entirely to your brand and message. You supply the content, including the subject line, courses, copy, and images. We format and deliver your message to our highly engaged opt-in subscribers.

Sponsored Content Email checklist

- Provide a subject line; 41 characters max
- Include a line of preview text, which follows the subject line & can be seen before the email is opened; 80 characters max
- Provide all assets for the body of the email (detailed on the next page)
- Include any instructions for tracking links within the email for reporting purposes (e.g., &utm_campaign=example)
- Provide a list of email addresses from your organization to send proofs* & the final email

Tips to get the most out of your sponsored email

- Your subject line should be compelling, concise, and relevant.
- Tie your email to a landing page. This is a great way to convert clicks to clients.
- More than half of all email is opened on a mobile device. Keep your copy concise and scannable for readers on the go.
- When in doubt, conduct a five-second test. You'll get higher conversions if your message grabs the audience's attention within the first few seconds of opening the email.
- We recommend that you and your team members opt in to receive marketing emails from AudiologyOnline. [Register here for free](#) to get a first-hand experience of what the audience will receive.
